NUST - SEECS

School of Electrical Engineering and Computer Science (SEECS) symbolizes a paradigm shift in the culture of higher education in Pakistan. It stands tall as an institute with a progressive vision and dynamic focus on the key imperatives of sound engineering education marked by quality of instruction and research on its newly built campus in the idyllic setting of federal metropolis.

Today it is one of the enviable seats of higher engineering education in Pakistan with an ambition to have a prestigious global stature of its own. It already enjoys international recognition as a centre of excellence. The school is fully committed to the promotion of IT and engineering education, marked by creativity, innovation and life-long learning.

Department of Computing

Message from Associate Dean

Prof. Dr Faisal Shafait

I am very pleased to see you achieving a momentous millstone of your life. At Department of Computing, we aim to produce graduates who not only have excellent professional and technical competence, but are also inculcated with the norms and etiquettes, which are essentially required to successfully excel in the professional career. Our responsibility is to well equip our students so that they contribute positively and resolve the issues in our society through their technical skills. We also polish the intellectual and entrepreneurial skills of our students and hence we believe that you will be able to make a difference in the market, as you embark upon the new journey.

You are the flag-bearers now and we are very confident that you have the right knowledge-base and technical skill set required to flourish in the computing industry. My advice would be to always welcome challenges in your professional life with dignity, honesty and never forget that there is no replacement for hard work. So step ahead and make your parents, teachers and your alma mater proud! Wish you all the best for your future endeavors.

Department of Computing

Department of computing at SEECS carries out research and education in the areas of computer science and software engineering. The department offers highly acclaimed Bachelors and Masters Programs whose alumni have outstanding success rate in industry and academia. Almost all of our students are either employed in lucrative positions in industry, or studying in high quality universities around the world. The department also offers PhD programs in Information Security, Information Technology and Computer Science to fulfill the requirement of qualified researchers and academics in universities and research centers in Pakistan.

Academics

The department strives to provide world-class education to its students, by emphasizing conceptual learning, critical thinking and creative-solving in all of its courses. Most technical courses have hands-on lab components to encourage the practice of “learning by doing”. Our curriculum is based on the HEC-approved Curriculum and also follows the recommendations of ACM and IEEE. We encourage faculty members to include in their courses projects and assignments that can spur creativity and innovation among our students. In this way, we provide our students the skills and abilities needed to achieve excellence in their career, academics pursuits, and life in general.

Faculty

The department is proud to have at its service a core of highly qualified faculty members, most of whom hold PhDs in their respective fields. The faculty is involved not just in teaching activities, but also spends a large portion of their time doing research at the cutting-edge of computing technology. Most faculty members have publications in reputed international conferences, research journals and books.

Research

Research in the Department of Computing spans the entire range of computing. Some of the active research areas in the Department include:

- High-performance Computing
- Multi-agent Systems
- Web Technology
- Internet of things
- Cyber security & Computer Forensics
- Big Data
- Artificial Intelligence & Machine Learning
- Database Systems
- Computer Networking

- Semantic Web and \Knowledge Repetitions
- Tele-medicine and Surgical Robotics
- Medical Imaging

International Collaborations

The Department of Computing enjoys a wide network of collaborations with industry and university partners, both in Pakistan and abroad. Within Pakistan, department works closely with industry to improve its courses in step with industries' requirements, undertake joint research and development projects, set up internship opportunities for students, and arrange workshops and seminars to keep students aware of the latest trends in computing technology. The Department also shares academic collaboration with some of the world's top universities and research centers, including the European organization for Nuclear Research (CERN), California Institute of Technology, Stanford University, TUKL University Germany, University of North Carolina at Charlotte, University of Portsmouth, EPFL Lausanne, Switzerland and Telecom SudParis, France. This enables the department to conduct high-quality collaborative research with some of the top scientists in their respective fields. Many students are also given the chance to visit these research centers and work closely with the top minds in their fields.

Lab Facilities

Research facilities at Department of the following labs:

1. China-Pakistan Intelligent Systems (CPInS)
2. TUKL
3. IOT
4. High Performance Computing (HPC)
5. Machine Vision and Intelligent Systems Lab (MachVIS lab) this name is for DoC or SEECs internal
6. Knowledge-Based Systems (KBS)
7. KTH
8. Deep Learning Laboratory (DLL)
9. Information Security & Privacy Lab

Teaching Labs also play a vital role in training and development of students. These include:

1. Computing Lab 1 (Shirazi Lab)
2. Computing Lab 2 (Fabi Lab)
3. Computing Lab 3 (Biruni Lab)
4. Computing Lab 4 (Babbage Lab)
5. Computing Lab 5 (Turing Lab)
6. Computing Lab 6 / IBM/CERN Lab
7. Media Lab

Bachelors of Engineering in Software Engineering (BE SE)

Program Description

Software engineering is the practice of designing and implementing large, reliable, efficient and economical software by applying the principles and practices of engineering. The aim of the Bachelors in software engineering degree is to produce well, rounded, software engineers who can fulfill the demand for software researchers, academic and developers in Pakistan. While the study of software engineering has a lot in common with computer science, software engineers learn much more about creating high-quality software in a systematic, controlled, and efficient manner. Software engineers are trained in all aspects of software life cycle, from specific through analysis and design to testing maintenance and evaluation of the product. Software engineers are concerned with safety and reliability of the product as well as cost and schedule of the development process.

Unique Features

The software engineering program teaches students the application of engineering concepts, techniques, and methods for the design, development, deployment and maintenance of software systems. Our graduates are qualified professionals involved in the technical work of designing, documenting, coding and testing large software products. They are also responsible for tasks such as directing projects, managing teams, and estimating cost resources, assessing business plans, reviewing proposals and suggesting innovations. The program focuses on imparting the knowledge and training, which enables students to harmonize theory with practice, concept with application and problem with solution. It prepares them to apply ably engineering principles, practices and processes to design, develop, deploy and maintain software systems. The program leads to development of students' professional and interpersonal skills.

Important Courses

With software permitting virtually all aspects of our work in our society, a Software Engineering graduate has the option to work in many different sectors such as software industry, telecommunications, finance, healthcare, manufacturing, retailing, security, transport etc. other engineering areas like aeronautical and automotives, building, electrical, etc. also have increasing needs for software engineering. The entertainment industry with video games and movie animation too has a large demand for Software Engineering. In addition, the SE program develops a strong background for pursuing higher education and research. Graduate from our programs are studying and doing research at some of the best universities and institutes around the world including Stanford University (USA), California Institute of Technology (CALTECH-USA). CERN (Geneva), University of North Carolina (UNC-Charlotte-USA), University of Reading (UK), Kyung-Hee University (South Korea), University of South Brittany, (France) and University of West England (UK).

Career Outcomes

Software Engineering, Object Oriented Programming, Data Structures, Digital Logic Design, Data Base Systems, Operating Systems Concepts and Design, Computer Networks, Computer Organization and Assembly Language, Software Construction, Software Design and Architecture, Software Quality Engineering, Software Project Management

Hey there. I'm Deedahwar, a Senior Year Undergraduate of Software Engineering at NUST and ever since I can remember, I've been intrigued by the rapid advancements in technology and that was the main reason why I chose to become a Software Engineer. My major interests lie around the field of Artificial Intelligence and Machine Learning where I'm also currently involved in a research project at my university. Developing Neural Networks and using Regression/Clustering to predict and analyze data and replicating humanistic behavior in machines has always resonated with me.
