## NUST - SEECS

School of Electrical Engineering and Computer Science (SEECS) symbolizes a paradigm shift in the culture of higher education in Pakistan. It stands tall as an institute with a progressive vision and dynamic focus on the key imperatives of sound engineering education marked by quality of instruction and research on its newly built campus in the idyllic setting of federal metropolis.

Today it is one of the enviable seats of higher engineering education in Pakistan with an ambition to have a prestigious global stature of its own. It already enjoys international recognition as a centre of excellence. The school is fully committed to the promotion of IT and engineering education, marked by creativity, innovation and life-long learning.

## Department of Computing

Message from Senior Head

**Prof. Dr Faisal Shafait**

I am very pleased to see you achieving a momentous millstone of your life. At Department of Computing, we aim to produce graduates who not only have excellent professional and technical competence, but are also inculcated with the norms and etiquettes, which are essentially required to successfully excel in the professional career. Our responsibility is to well equip our students so that they contribute positively and resolve the issues in our society through their technical skills. We also polish the intellectual and entrepreneurial skills of our students and hence we believe that you will be able to make a difference in the market, as you embark upon the new journey.

You are the flag-bearers now and we are very confident that you have the right knowledge-base and technical skill set required to flourish in the computing industry. My advice would be to always welcome challenges in your professional life with dignity, honesty and never forget that there is no replacement for hard work. So step ahead and make your parents, teachers and your alma mater proud! Wish you all the best for your future endeavors.

## Department of Computing

Department of computing at SEECS carries out research and education in the areas of computer science and software engineering. The department offers highly acclaimed Bachelors and Masters Programs whose alumni have outstanding success rate in industry and academia. Almost all of our students are either employed in lucrative positions in industry, or studying in high quality universities around the world. The department also offers PhD programs in Information Security, Information Technology and Computer Science to fulfill the requirement of qualified researchers and academics in universities and research centers in Pakistan.

### Academics

The department strives to provide world-class education to its students, by emphasizing conceptual learning, critical thinking and creative-solving in all of its courses. Most technical courses have hands-on lab components to encourage the practice of “learning by doing”. Our curriculum is based on the HEC-approved Curriculum and also follows the recommendations of ACM and IEEE. We encourage faculty members to include in their courses projects and assignments that can spur creativity and innovation among our students. In this way, we provide our students the skills and abilities needed to achieve excellence in their career, academics pursuits, and life in general.

### Faculty

The department is proud to have at its service a core of highly qualified faculty members, most of whom hold PhDs in their respective fields. The faculty is involved not just in teaching activities, but also spends a large portion of their time doing research at the cutting-edge of computing technology. Most faculty members have publications in reputed international conferences, research journals and books.

### Research

Research in the Department of Computing spans the entire range of computing. Some of the active research areas in the Department include:

- High-performance Computing
- Multi-agent Systems
- Web Technology
- Internet of things
- Cyber security & Computer Forensics
- Big Data
- Artificial Intelligence & Machine Learning
- Database Systems
- Computer Networking

- Semantic Web and \Knowledge Repetitions
- Tele-medicine and Surgical Robotics
- Medical Imaging

## International Collaborations

The Department of Computing enjoys a wide network of collaborations with industry and university partners, both in Pakistan and abroad. Within Pakistan, department works closely with industry to improve its courses in step with industries' requirements, undertake joint research and development projects, set up internship opportunities for students, and arrange workshops and seminars to keep students aware of the latest trends in computing technology. The Department also shares academic collaboration with some of the world's top universities and research centers, including the European organization for Nuclear Research (CERN), California Institute of Technology, Stanford University, TUKL University Germany, University of North Carolina at Charlotte, University of Portsmouth, EPFL Lausanne, Switzerland and Telecom SudParis, France. This enables the department to conduct high-quality collaborative research with some of the top scientist in their respective fields. Many students are also given the chance to visit these research centers and work closely with the top minds in their fields.

## Lab Facilities

Research facilities at Department of Computing includes High Performance Computing (HPS) Lab, Knowledge-based Systems Labs (KBS), TUKL Lab, Centre for Research in Modeling Simulation and vision (CRIMSON) Lab, Center of excellence in Mobile Computing (CEME) Lab. Teaching Labs have also been established which play a vital role in training and development of students. These include computing Lab 1 (Shirazi Lab), Computing Lab 2 (Fabi Lab), Computing Lab 3 (Biruni Lab), Computing Lab 4 (Babbage Lab), Computing Lab 5 (Turing Lab) and IBM/CERN Lab.

# Bachelors of Engineering in Computer Science (BS CS)

## Program Description

The BSCS program is a new program offered by SEECS. The aim of the degree is two-fold: firstly, to create well-rounded computer Scientists who will fulfill the demand for computer science researchers and software developers in Pakistan and secondly to nurture entrepreneurship among the young computer scientist to promote innovation at the national level. The emphasis of the entrepreneurship in the program will hopefully give worth to new developments in the field of computing. The students of this program will help in strengthening research projects in core computer science areas and bring new ideas for establishing independent business that shall contribute towards the economy of the country.

## Unique Features

The aim of the Bachelors in Computer Science degree is to produce computer professional who can create new technologies and ideas, and devise new ways to vies computers. The degree in CS can open doors in to the professional words of many other disciplines. Our CS program serves those students who wish to proceed as entrepreneurs or generalists in computing or who aspire for graduated studies, research positions, or cross-disciplinary innovation. This program develops skills in students for applying the concepts, principles, and practices in Computer Science for analyzing and solving real world problems to support industry as well as research and development organizations. The students are provided effective personal development and team-work skills for continuing professional growth and life-long learning and awareness of their social, professional and ethical responsibilities in national and international environment.

## Important Courses

The CS program will contain mandatory courses in the areas of Artificial Intelligence, Compiler Constructions, Theory of Automata and Formal Languages, Scientific Computing and analysis of algorithm in addition; the CS program will contain courses like Introduction to Management, Strategic Marketing and Management, Entrepreneurship, Intellectual Property, Accounting and New Business Ventures to encourage entrepreneurship in the students

## Career Outcomes

Computer Science graduated have a world of career opportunities before them. The CS professionals can generate and implement creative solutions to difficult problems and can train the next generation of computer scientist and software professionals. They can not only work as entrepreneurs but also have the option to work as software developers and analysts in different sectors such as software industry, telecommunications, fiancé, health care etc. In addition, the CS program develops a strong background for perusing higher education and research. Graduated from our program can study and do research at the best universities and institutes around the world.
